# The first room *of the day*

Most of us see the bathroom vanity before we see anything else in the morning. It holds the toothbrush, the coffee-cup-sized pause before the day starts, the rush out the door at night. It is also the piece of furniture people agonise over most, because it has to be practical and beautiful in a room that is wet, steamy and small.

We made this edition because choosing a vanity should feel like choosing furniture, not ordering a box. Every vanity in these pages is made to order by Marquis, to the size, layout, top, basin, colour and handle you choose. That is a lot of freedom, so we have tried to make the decisions simple: what each choice does, what it suits and what to ask before you commit.

Read it with a cup of tea, fold the corners down, then come and see us in Baringa.

*Reagan,* ONWOOD TILES

*"Choosing a vanity should feel like choosing furniture, not ordering a box."*

MARQUIS HAMILTON VANITY

MARQUIS BOWRAL VANITY

# 01

MARQUIS OXFORD VANITY

# Made to order, *made here.*

*A family business from the Hunter Valley has been building bathroom furniture since 1979. Every piece starts when you order it.*

Marquis began in 1979 in the NSW Hunter Valley and is still family owned. That matters more than it sounds. A vanity is not pulled off a warehouse shelf: it is made once you have chosen it, to your width, your layout, your benchtop, your basin, your colour and your handles.

That is why the range feels so broad. One design, the Lake, comes in 23 layouts from 600mm to 1800mm. The Camden, Provincial, Gold and Riviera each come in 20 sizes. Shaker or slab, fluted or flat, painted or timber look: the same factory builds them all, to order.

Most vanities take around three to four weeks to be made and freighted to our Baringa warehouse. Stone and timber tops can take a little longer. If you are already mid-renovation, the Express ranges usually leave the factory within five business days.

MARQUIS CHELSEA VANITY

THE NUMBERS

**1979**

Established 1979

Family owned

Made to order

Widths from 600mm to 1800mm

Lifetime warranty on vanity cabinets and hardware

# Seven *decisions*

*Every Marquis vanity is built from the same seven choices.*
*Make them in this order and the rest falls into place.*

MARQUIS AVION VANITY

**1** **Size.**

Measure the wall, then leave room for the door swing and the shower screen. Widths run from 600mm to 1800mm.

**2** **Layout.**

Drawers, doors or both, and one basin or two. Drawers keep things tidy; doors fit taller bottles.

**3** **Mounting.**

Wall-hung, on a kick base, or on legs. See story 04

**4** **Top.**

Symphony, Caesarstone, Vasari, Dekton, or a one-piece moulded top. See story 07

**5** **Basin.**

Above-counter, semi-inset or under-counter, centred, off-centre or doubled. See story 08

**6** **Finish.**

Painted, Thermograin, or Duragrain timber look. See story 09

**7** **Handle.**

A pull, a fingerpull, or no handle at all. See story 06

*“Make the seven decisions in order and the rest falls into place.”*

# Six *bathrooms*

THE LOOK · ARCO

Warm timber and a fine V-groove arch on every front, made to sit under the matching Arco arched mirror. Soft terracotta, linen and plants do the rest.

MARQUIS ARCO VANITY · VISUALISATION

THE LOOK · CAMDEN

A classic Shaker with softly rounded corners, painted deep blue and finished in brass. Traditional bones, modern attitude.

THE LOOK · PORT

A distinctive curved door and drawer profile in a soft cream, under a half-moon mirror. Calm, warm and a little bit retro.

SOME IMAGES ARE AI-GENERATED ILLUSTRATIONS; CONFIRM FINISHES FROM A PHYSICAL SAMPLE.

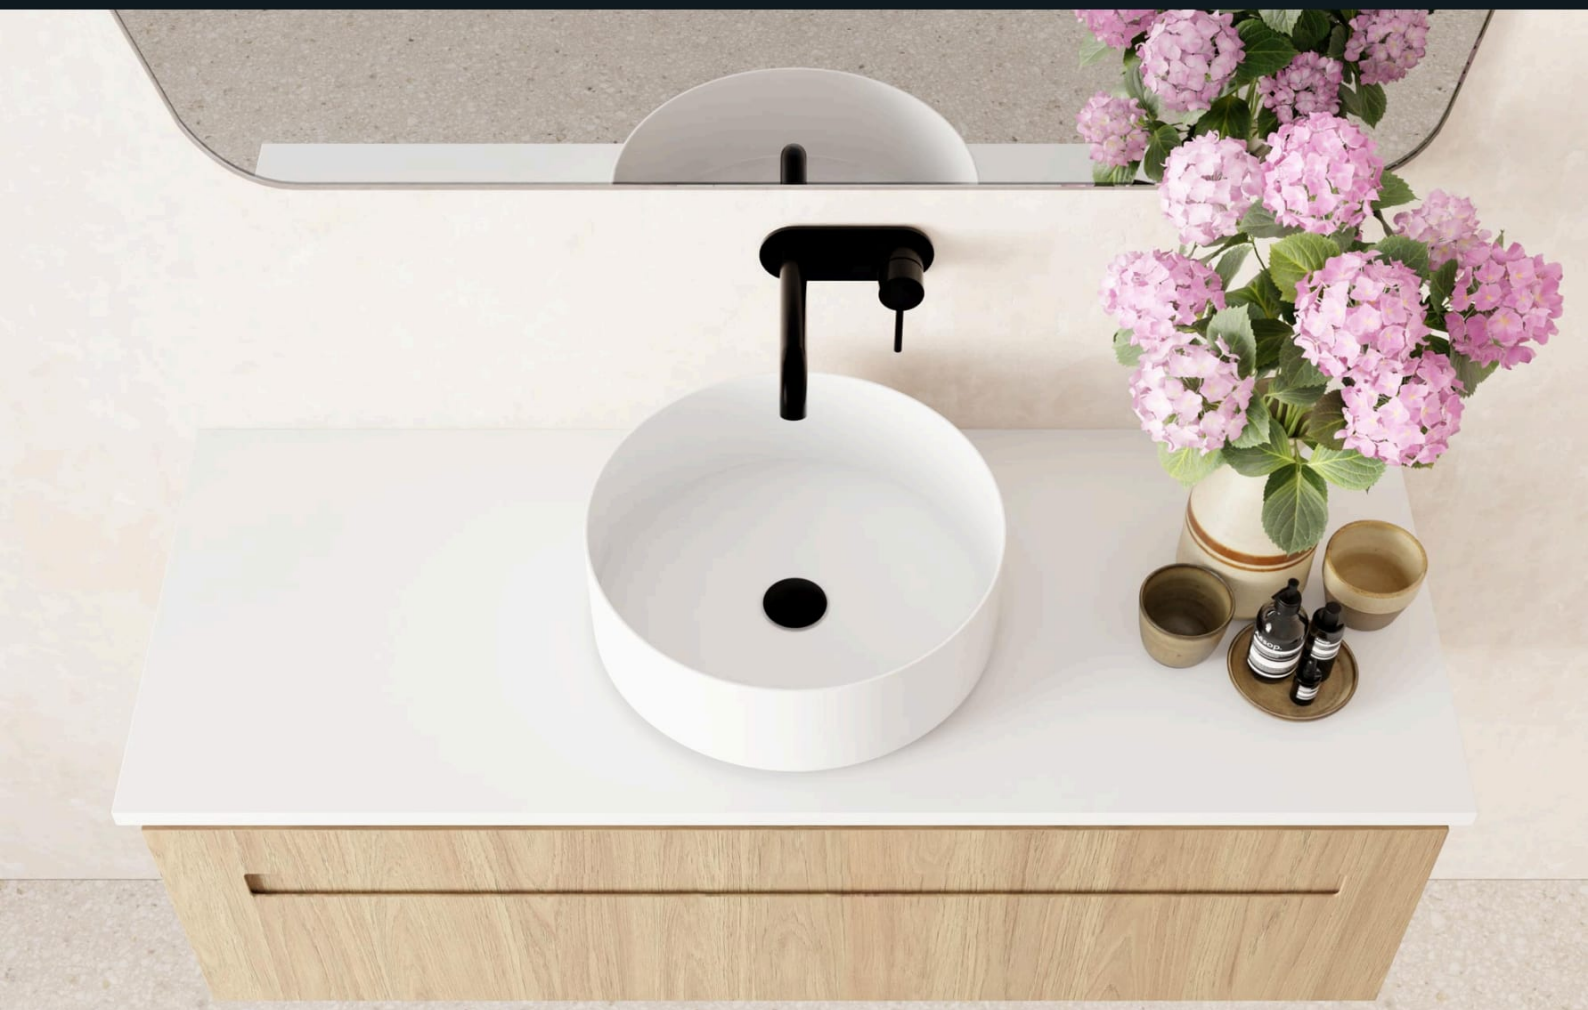

MARQUIS KIAMA VANITY

04 / MOUNTING · 2 MIN READ

# Off the floor, on a kick, *or up on legs*

*How a vanity meets the floor changes how the whole bathroom feels.*

MARQUIS ROSSI VANITY

MARQUIS ROSSI VANITY

## Wall-hung

Lifting the cabinet off the floor shows more tile, so a small room reads bigger, and cleaning underneath is easy. Many wall-hung vanities can take an LED strip underneath for a soft night light. Plan ahead: the vanity is fixed through its back panel into the wall framing, so tell your builder before the walls are sheeted.

MARQUIS KIAMA VANITY

## Kick base

A recessed plinth grounds the vanity like built-in furniture and gives you the most storage for the width. A good fit for family bathrooms.

MARQUIS PALM VANITY

## Legs

Many ranges can sit on legs instead of a kick, in timber, pillar or square styles, for a lighter, freestanding look with the floor flowing underneath.

GOOD TO KNOW

Wall-hung vanities need the wall framed to suit, so decide early. Tapware and wastes are sold separately. Installation must be by a licensed tradesperson.

# **Texture is** *the new colour*

The most interesting vanities right now are not about colour at all. They are about the way light falls across the front.

*"The most interesting vanities are about the way light falls across the front."*

**Fluted.** Fine vertical ribs that catch the light: Cove, Lake, Shore and Merewether.

**Shiplap.** Coastal panelling that wraps all the way around the cabinet: Anna, Nelson, Chelsea and Valencia.

**Saw-tooth.** A ridged, faceted front that changes as you walk past: Peak and Salamander.

**Curves.** A softly rounded cabinet front (Reef, Shore) or rounded open shelf ends (Avion).

**V-groove Shaker.** Framed fronts with a grooved panel, for country and Hamptons rooms: Chateau and Kiama.

# **To handle,** *or not to handle*

*Handles are the jewellery of a vanity. Leaving them off is a decision too.*

MARQUIS MARLO VANITY

MARQUIS GOLD VANITY

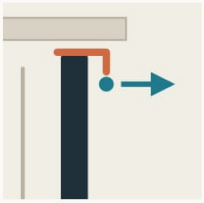

MARQUIS OXFORD VANITY

THE TEST

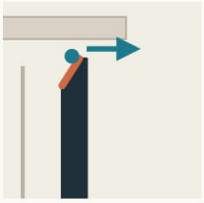

Open a drawer with wet hands. If it feels awkward in the showroom, it will feel awkward every morning.

FIVE WAYS TO OPEN A DRAWER · SIDE VIEW · TEAL SHOWS THE GRIP AND THE PULL

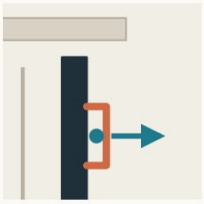

## Top pulls

A slim metal profile capping the top edge of the drawer, lip turned down so your fingers hook under it. In brass, aluminium, gun metal, black, white or stainless steel on ranges like Cove and Shore.

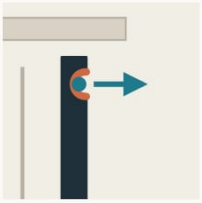

## Reverse fingerpull

The back of the drawer's top edge is bevelled away, so the front looks flat and your fingers reach over the top to pull: Avion, Riviera, Nelson, Oxford and Valencia.

## Your choice of handle

Many ranges let you swap the fingerpull for a handle fixed to the face.

## Recessed fingerpull

A slot routed into the face just under the top edge, so the front stays flat and handle-free: Gold and Rossi.

## Inverted shark fin

The Marlo's signature: a fine fin along the bottom edge of each drawer, angled down and back. It casts a soft shadow line, and you open the drawer by gripping the fin from below.

# **The top does** *the heavy lifting*

*The top takes the water, the heat of the hairdryer, the makeup and the dropped perfume bottle. It is worth getting right.*

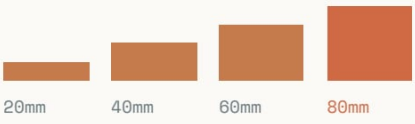

MARQUIS PALM VANITY

MARQUIS NELSON VANITY

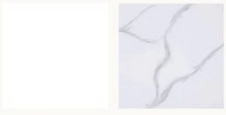

| TOP | CHARACTER | MARQUIS WARRANTY |
|---|---|---|
| **Symphony** | The everyday all-rounder, in a range of stone looks | 10 years |
| **Caesarstone** | Engineered stone, crisp edges, wide colour range | 10 years |
| **Dekton** | Ultra-compact surface, very hard wearing | 15 years |
| **Vasari** | Premium stone-look surface, offered alongside Dekton | Ask us |
| **Moulded**<br>Davos polymarble, Casa ceramic | Top and basin in one piece: no join to clean | 2 years |

Most ranges start with a 20mm top, with thicker stone upgrades of 40mm and 60mm for a more solid look. The Chelsea goes further, with a deep 80mm stone top over its shiplap cabinet. One-piece moulded tops, on ranges like Bowral and Kiama, combine top and basin with no join to clean.

# Know your *top*

Every top looks good on day one. The difference is how it copes in year five: the hairdryer, the nail polish remover, the toothbrush rattling against it. Here is what each one is made of, what it is good at and what to watch for.

BLANCO

MODENA

MARBELLA

TAJ MAHAL

## Symphony

WARRANTY · 10 YEARS

*A modified acrylic solid surface made from resins, polymers and natural materials. The colour runs right through it.*

WHY CHOOSE IT

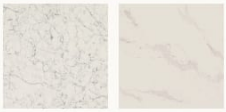

100% silica free and sanitary grade. Light scratches and scuffs buff out with an acrylic polish, and deeper ones can be repaired.

KEEP IN MIND

Softer than stone, so it marks more easily. Keep hair straighteners and hot tools off it: prolonged heat can damage it.

PURE WHITE

CLOUDBURST

WHITE ATTICA

STATUARIO

## Caesarstone

WARRANTY · 10 YEARS

*An engineered quartz surface made from mineral elements, pigments and polymer resins. Silica safe, at under 1% crystalline silica since 2024.*

WHY CHOOSE IT

Non-porous, so it resists stains, mould and bacteria. A wide colour range with crisp, clean edges.

KEEP IN MIND

Use a heat mat for hot tools, and treat the edges kindly: a hard knock can chip stone, and chips are hard to hide.

TREVI

ENTZO

MARMORIO

SABBIA

## Dekton

WARRANTY · 15 YEARS

*An ultra-compact surface: raw and recycled materials pressed and fired at extreme temperature and pressure. 100% silica safe.*

WHY CHOOSE IT

Exceptionally hard, with zero porosity, and it takes 400°C without damage. Marquis recommends it above all others for vanity tops.

KEEP IN MIND

A slim 12mm slab as standard, with 40mm and 60mm upgrades for a heavier look. A premium choice.

SAVOY IVORY

TRAVERTINO

OMBRE

MOROCCA

## Vasari

WARRANTY · ASK US

*Italian large-format porcelain, dry-compacted and fired in ceramic kilns.*

WHY CHOOSE IT

Resists scratches, heat, stains, chemicals and UV fading, and it is easy to clean. Beautiful marble and travertine looks.

KEEP IN MIND

Like Dekton, a slim 12mm slab as standard, with 40mm and 60mm upgrades.

CASA CERAMIC

## Moulded

WARRANTY · 2 YEARS

*Top and basin moulded as one piece: Casa ceramic, or Davos polymarble on the traditional Bowral and Kiama.*

WHY CHOOSE IT

No join between basin and top for grime to collect in, so it is the easiest top to keep clean. The affordable way to a full vanity.

KEEP IN MIND

Avoid thermal shock: run cold water into the basin first, then add hot. Available on selected sizes.

# Which top *suits you?*

| TOP | SCRATCHES | HEAT | STAINS | REPAIRS | SILICA |
|---|---|---|---|---|---|
| **Symphony** | Can mark, but buffs out | Keep hot tools off | Colour runs through | Yes | 100% free |
| **Caesarstone** | Very hard | Use a heat mat | Non-porous | Difficult | Under 1% |
| **Dekton** | Exceptionally hard | Takes 400°C | Zero porosity | Difficult | 100% safe |
| **Vasari** | Scratch resistant | Heat resistant | Non-absorbent | Difficult | Ask us |
| **Moulded** | Ceramic hard, polymarble softer | Cold water first | Glazed, wipes clean | Limited | Ask us |

## Quick picks

BUSY FAMILY BATHROOM

Dekton. The hardest, most forgiving top, and Marquis's own first choice for vanities.

STONE LOOK, BIG COLOUR CHOICE

Caesarstone. Crisp edges and a wide range of whites, concretes and marbles.

TRADITIONAL ROOM, SENSIBLE BUDGET

A one-piece moulded top on the Bowral or Kiama: nothing to grout, nothing to seal.

SEAMLESS AND FIXABLE

Symphony. Silica free, warm to the touch, and light scratches polish out.

MARBLE OR TRAVERTINE LOOK

Vasari or Dekton. Porcelain-tough surfaces with the drama of real stone.

WANT IT TO LOOK HEAVIER?

Upgrade Caesarstone, Dekton or Vasari to 40mm or 60mm. The Chelsea goes all the way to 80mm.

## Caring for *any top*

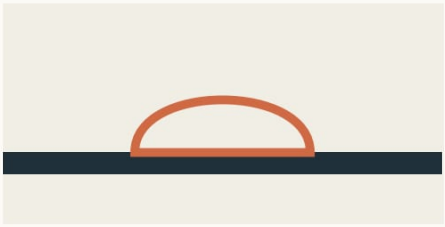

- Warm soapy water or a mild spray on a soft cloth, then dry.
- Run cold water into the basin before hot, so the bowl never gets a thermal shock.
- Never put hair straighteners or hot tools straight onto any top.
- Keep acetone, paint remover and harsh chemicals away.

*"If in doubt, choose Dekton. If you love it, choose the one you love: they are all good tops."*

Material facts from Marquis. Silica figures as stated by Marquis and SafeWork Australia approvals. See every colour on a real sample in the showroom.

# Basin *language*

*Three ways to sit a basin, and each changes the look of the whole vanity.*

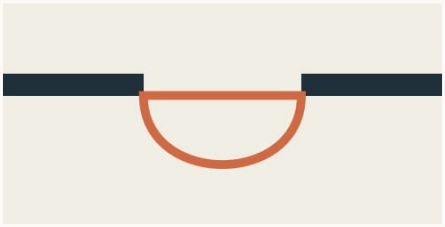

## Above-counter

The basin sits on top like a bowl: the most sculptural option and the easiest to change later.

## Semi-inset

Half in, half out: a lower rim height and a little more bench space.

## Under-counter

Fixed beneath the stone so the top runs clean to the edge and wipes straight into the bowl.

TIP

Off-centre and double-basin layouts are available on many ranges. Two basins suit a shared ensuite; one off-centre basin leaves room to put things down.

DURAGRAIN · MARQUIS PHOENIX

THERMOGRAIN · MARQUIS SALAMANDER

PAINTED · MARQUIS ANNA

09 / COLOUR · FINISH SCHOOL

# Board, wrap *or paint?*

It is the question we are asked most. All three finishes sit on Marquis's moisture-resistant board, all three carry the lifetime cabinet warranty, and all three look beautiful. The difference is in how they are made, which front shapes they suit, and how they live day to day.

## Duragrain

NATURAL OAK · NOTAIO WALNUT · DAINTREE · BURNT OCHRE

WHAT IT IS

A decorative board: timber grains and solid colours on a hard-wearing surface, with the edges sealed by edge tape.

LOVE IT FOR

The biggest choice, up to 48 colours, many with the grain running vertically or horizontally. Textured woodgrains that look and feel real.

KEEP IN MIND

Suits flat and framed fronts: it cannot wrap around fluting or curves. You will see a fine line where the edge tape meets the face.

ON RANGES LIKE

Avion, Gold, Marlo, Oxford, Palm, Phoenix, Pier, Riviera, Rossi

## Thermograin

TASMANIAN OAK · FLORENTINE · TOPIARY · PALLIDO

WHAT IT IS

A thermolaminated finish: a decorative skin heat- and vacuum-pressed over moisture-resistant MDF, so it wraps a shaped front in one piece.

LOVE IT FOR

Seamless over fluting, ribs, arches and Shaker profiles, with no edge lines on the face. Twenty soft woodmatt oaks and smooth solids.

KEEP IN MIND

Keep hair straighteners and hot tools away from the fronts: heat can lift a wrapped finish. Fewer colours than Duragrain.

ON RANGES LIKE

Arco, Chifley, Cove, Hamilton, Lake, Merewether, Peak, Port, Reef, Salamander, Shore

## Painted

WHITE MATTE · PALE EUCALY… · FLOODED GUM · DEEP OCEAN

WHAT IT IS

Two-pack polyurethane paint, the hard-wearing, highly resistant coating used on architectural joinery, sprayed in gloss or matte.

LOVE IT FOR

Any Dulux colour. White Gloss, White Matte and six Dulux mattes at no extra cost. Shows off Shaker and shiplap detail beautifully.

KEEP IN MIND

Custom Dulux colours cost extra. Gloss and dark colours show fingerprints and marks more readily, so they need more wiping.

ON RANGES LIKE

Anna, Bowral, Camden, Chateau, Chelsea, Kiama, Nelson, Provincial, Valencia, plus Gold, Phoenix, Riviera and Rossi

# Which finish *suits you?*

| | Duragrain | Thermograin | Painted |
|---|---|---|---|
| THE LOOK | Real timber grains and solid colours | Woodmatt oaks and smooth solids | Solid colour, gloss or matte |
| COLOURS | Up to 48, by range | 20 | Any Dulux colour |
| FRONT SHAPES | Flat and framed | Fluted, ribbed, arched, Shaker | Shaker, shiplap and flat |
| EDGES | Fine edge-tape line | Wrapped, seamless | Painted, seamless |
| WATCH FOR | Knocks on edges | Heat from hot tools | Fingerprints on gloss and dark colours |
| COST | Included | Included | Eight colours included, custom Dulux extra |

*"Choose the front shape first. The shape usually decides the finish for you."*

## Care, the same *for all three*

- Wipe up splashes straight away. The board is moisture resistant, not waterproof.
- Warm soapy water or a mild spray on a soft cloth, then dry.
- No scourers, abrasive cleaners, bleach, ammonia, acetone or solvents: they void the warranty.
- Keep steam and hot tools away from the fronts.

A FEW OF THE COLOURS · SEE THEM ALL ON REAL SAMPLES IN THE SHOWROOM

Colours in print are a guide only. Marquis advises testing a real sample for fingerprints and ease of cleaning before you choose, and darker finishes show marks more readily than light ones.

# Any colour *you like*

*"Any Dulux colour you like. Yes, really."*

MARQUIS RIVIERA

MARQUIS CHATEAU

MARQUIS PIER

MARQUIS LAKE

MARQUIS PROVINCIAL

## Painted

White Gloss, White Matte, six Dulux matte colours at no extra cost, or any Dulux colour you like in 2-pac paint, on ranges like Anna, Camden, Provincial and Nelson.

## Thermograin

20 colours, from warm oaks and walnut to soft greens and whites, on ranges like Cove, Lake, Merewether and Arco.

## Duragrain

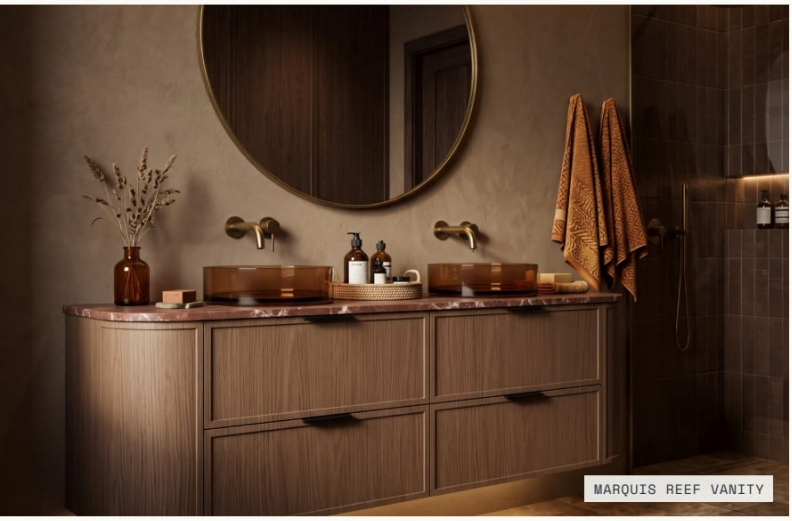

More than 40 timber looks on some ranges, with the grain running vertically or horizontally on many of them.

MARQUIS PHOENIX VANITY

MARQUIS SALAMANDER VANITY

# Six bathrooms, *continued*

MAREWETHER VANITY · VISUALISATION

THE LOOK · MEREWETHER

A fluted drawer over an open shelf for towels and baskets. Here it is doubled up, two basins under a round mirror, against glazed blue tiles.

SHORTLAND VANITY · VISUALISATION

THE LOOK · SHORTLAND

A minimalist wall-hung vanity with an off-centre basin and a bank of drawers on the other side. Dark, quiet and very grown up.

# Small room, *no compromise*

1. **Go compact.** The Marq Compact is made for ensuites and powder rooms in 600mm, 750mm and 900mm widths.

2. **Go slim.** The Rossi and Valencia are just 350mm high, so the room feels lighter.

3. **Go shallow.** Ranges like Cove, Pier and Merewether are 460mm deep.

4. **Go off-centre.** Shortland puts the basin to one side and the drawers on the other, so there is space to put things down.

5. **Lift it.** A wall-hung vanity shows more floor, and more floor reads as more room.

MARQUIS MARQ COMPACT VANITY

# Mirror, *mirror*

*The mirror is the second-biggest thing on the wall. Treat it as part of the vanity, not an afterthought.*

### Echo a shape.

An arched mirror softens a square room; a round one calms a busy tile. The Arco vanity is designed to sit under the Arco arched mirror.

### Mind the width.

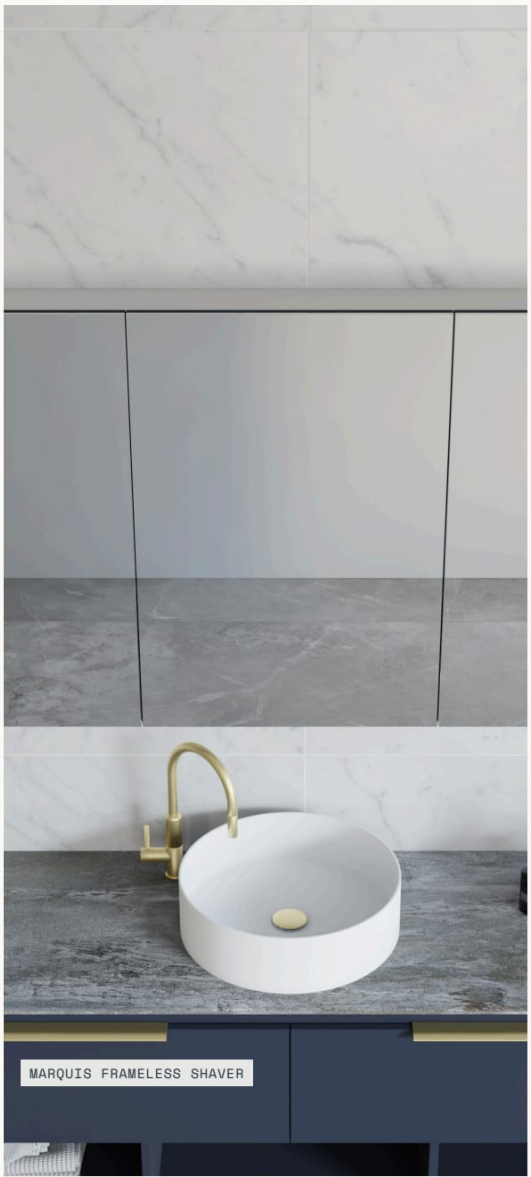

A mirror a little narrower than the vanity usually looks right.

### Want storage?

A shaving cabinet hides everyday clutter behind the mirror.

# Measure before *you fall in love*

*Ten minutes with a tape measure saves the classic heartbreak: the perfect vanity that is 40mm too wide for the wall.*

## The cabinet is narrower

Every cabinet sits a little inside its benchtop, from 5mm to 26mm narrower depending on the range, so the top overhangs neatly. Quote the top width when you measure the wall.

## Wall to wall

You do not need an odd size to fill a gap between two walls. Choose the nearest standard size and close the gap with filler panels, on tops that allow it.

## Thicker tops add height

Most tops are 20mm, Dekton and Vasari 12mm. Upgrading stone to 40mm or 60mm raises the finished height, which matters most on a kick or legs.

**600 to 1800mm**
WIDTHS, ON MOST RANGES

**460 or 480mm**
DEEP, INCLUDING THE TOP

**350 to 640mm**
WALL-HUNG CABINET HEIGHTS

**840mm**
TO THE CABINET TOP ON A KICK

Typical Marquis dimensions shown. Every range has its own exact sizes on its product page and in its downloadable brochure at onwoodtiles.com.au.

MARQUIS LAKE VANITY

YOUR MEASURING CHECKLIST

**1 Wall to wall**

Measure the full width at the height of the top, and again at the floor. Old walls are rarely square.

**2 Doors and screens**

Check the swing of the door, the shower screen and the toilet. A drawer needs room to open fully in front of it.

**3 Water and waste**

Note where the pipes come out of the wall. Off-centre and double basins can line up with what is already there, and a cabinet-only order needs your plumbing details.

**4 Power**

Planning an in-drawer power point or LED lighting? Tell your electrician before the walls are sheeted.

**5 The wall itself**

Wall-hung vanities bolt through their solid back into the studs, so the wall needs framing where the cabinet sits.

**6 Mirror and light**

Measure the wall above too. A mirror the width of the vanity, or a little narrower, almost always looks right.

OUR TIP

Bring your measurements and a phone photo of the bathroom to the showroom. We will check the sizes with you before anything is ordered.

MARQUIS RIVIERA VANITY · VISUALISATION

14 / EXTRAS · 2 MIN READ

# The little *extras*

*The details you only notice every single morning. Most cost very little, and all of them are much easier to choose now than to add later.*

### LED lighting underneath

A soft glow under a wall-hung vanity turns a night-time trip into something calm. Available on selected ranges, including the Lake, Reef and Shore.

### Power in the drawer

An in-drawer power point with USB-A and USB-C, so the hairdryer, shaver and toothbrush charger live out of sight.

## Soft close, everywhere

Every Marquis drawer and door closes softly. The drawers are made in Austria and the hinges in Italy.

## Handles, or none

Top pulls from 100mm to 350mm in brass, aluminium, gun metal, black, white or stainless steel, a handle of your choice, or a fingerpull.

## Left or right

Drawer banks and shelf ends can go on the left or the right on many ranges, to suit the room rather than the brochure.

## Taps and basins

Tops can be drilled for no tap holes, one or three, and you can even supply your own basin. Overflow rings come in colours to match your tapware.

## Filler panels

Close the gap between a standard vanity and the wall for a built-in, wall-to-wall look.

## Legs your way

On ranges that offer legs, choose timber, pillar or square for a furniture feel.

MARQUIS PROVINCIAL VANITY

MARQUIS PALM VANITY

*"Choose the extras with the vanity. A power point is easy before the tiles go on, and hard after."*

# Build it *before you buy it*

ONWOOD 3D VANITY BUILDER · ILLUSTRATION · MEREWETHER (TOP), MARLO (BOTTOM)

Every Marquis vanity on our website has its own builder. Choose the size, layout, top, basin, colour and handles, and the builder only shows the options that range actually offers. Then open the 3D view to turn your vanity around, open the drawers and, with LED lighting, dim the room lights to see the glow. When it looks right, send it to us as a quote request and we will check every detail with you before anything is ordered.

**Scan to start building.**

ONWOODTILES.COM.AU/BRANDS/MARQUIS

**Need it sooner?**

Express ranges (Shore, Cove, Pier, Marq and Marq Compact, with Symphony or moulded tops) usually leave the factory within five business days.

MARQUIS PROVINCIAL VANITY

# How to *order*

1. Build it online or with us in the showroom.
2. We confirm every detail with you. Nothing is ordered until you are happy.
3. Marquis makes it to order, usually in three to four weeks. Freight to our Baringa warehouse is included.
4. Collect from Baringa, or we deliver across the Sunshine Coast for a quoted fee.
5. Have it installed by a licensed tradesperson.

# The *warranty*

| | |
|---|---|
| Vanity cabinets and hardware | Lifetime |
| Dekton tops | 15 years |
| Caesarstone and Symphony tops | 10 years |
| Polymarble and ceramic basins and tops | 2 years |
| Solid surface basins | 1 year |
| Mirrors and shaving cabinet doors | 1 year |
| LED strip lighting | 3 years |
| Commercial use, all products | 1 year |

Inspect your vanity before it goes in: if anything is damaged, call us before installing. The warranty requires installation by a licensed tradesperson. Terms as published by Marquis, November 2026.

# Come and see it *in person.*
